

San Pasqual Valley Soils

Worm Castings

100% Organic Soil Conditioner

Earthworms are used to produce organic castings which are an excellent soil amendment to help develop stronger root systems by enriching the biology and structure of the soil. Benefits include better soil aeration and moisture retention.

General Use Guidelines:

Vegetables, Perennials, Annual Flowers – 8 cups per 100 sq. ft.

Side dress ½ cup per plant every 2 months

Trees, Shrubs & Fruit Trees – Mix 1 part worm castings to 2 parts of soil

Apply 1 cup per every 1 ft. of plant height every 6-12 weeks during growing season

Succulents, Cactus, Palms and Indoor plants – Mix 1 part of worm castings to 3 parts of soil

Lawns – Apply 12 qts per 100 sq. ft. – work into top 1-2 inches

Top Dress – 6 qts per 100 sq. ft.
